

It was informed that C&I Dept. will take necessary steps to sort out the matter with support from other concerned Departments.

(Action : C&I Department)

43.06.10 AGENDA 10 :

Early resolution of the overlap issues with WBMDTC and BAPL

(Suggestion: ONGC-CIL)

In course of discussion it was emerged that in the sequence of exploitation of CBM and mining of Coal, for maximum utilisation of the natural resources, exploitation of CBM should be done before mining of coal in the same block.

The Chairman suggested ONGC-CIL Consortium to interact with MoPNG and MoC to take necessary steps in favour of extraction of CBM prior to mining of Coal and not to relinquish CBM Blocks where prospect of CBM was existing; The matter may also be referred to CGPB for issuing proper direction.

It was further discussed that the size of blocks is very important in terms of mining/CBM related activity and priorities of Organizations like GSI and ONGC may not be similar. The Board therefore, decided that the issue of size of coal/lease block would be referred to CGPB for a realistic decision.

(Action : ONGC-CIL Consortium & DMMWB)

43.06.11 AGENDA 11 :

Issues on Land Acquisition for Exploration Work

ONGCL for could accomplish the MWP of all the blocks except drilling. Drilling in all the pending locations will be done during Phase - I (end of phase - I is 22.12.2014). Land acquisition (LAQ) for all the released locations needs to be expedited for completion of drilling in time. Status of LAQ at all the locations is in different stages. Support and co-operation is
